WHAT’S IN THE NAME?

Emerging:
New, different, on the bleeding edge. New technologies and groundbreaking educational techniques that are not in common usage yet, but that may become critically important in future.

Media:
Beyond a narrow category of broadcast media towards a more expansive sense of technology as “medium,” encompassing the ways in which we interface with emerging technology.

Lab:
Where experimentation goes hand-in-hand with permission to fail. By deriving lessons from risks taken, and making those lessons available, we contribute to the development of best practices.

EML LAB PROCESS

EXPLORATION
- Identify New Paradigms
- Demos
- Training
- Knowledge Exchange

INSPIRATION
- New Ideas

INCUBATION
- Assign Resources
- Prototyping (Permission to fail)

ACCELERATION
- Grant Application
- Industry Connection

OUTPUTS
- Viable Products
- Best Practices

OUTCOMES
- New Tools, Processes & Services
- Institutional Knowledge-base

Share / Present / Promote

UBC EMERGING MEDIA LAB

VISION STATEMENT
EML is an experimental space where faculty, students, and staff from all disciplines collaborate with industry and community. Its mission is to evolve learning by creating tools and techniques using emerging media including Augmented, Mixed, and Virtual Reality.
